THE LATEST AXON EVIDENCE RELEASE

New for the September release - Automated people detection in Axon Evidence for faster evidence review, 15 new transcription languages, including bilingual models, available for Auto-Transcribe, new VR modules for training on mental health issues and more.

The September release is scheduled for September 30, 2024.

See the **Full Release Notes** PDF for details, including a list of resolved issues. The Axon Evidence Maintenance Schedule lists the updated schedule times for your region. We don't anticipate any downtime.

The September Axon release is coming soon. Below is a high-level look at the changes, along with a link to the complete release notes with more details.

What's new in Axon Evidence this month

New for the September release - Integration of My90 dashboards into Axon Evidence, search by geographic area in ALPR, customizable column display in your evidence search screen, lifetime deployment field for TASER energy weapons, and more.

- Axon Evidence:
  - Evidence search custom columns
  - User rank display on the Evidence Search page
- ALPR:
  - Search by Geographic Area
  - Partial plate search options

My90:
    - Overview of offerings
    - Interactive dashboards
- Third-Party Video Support:
    - Additional third-party video support
- Evidence Viewing and playback:
    - Audit trail for creating and deleting clips

Mobile apps

- Axon app:
    - Language support
    - General enhancements

Partner API updates

- The Device details request now returns "equimentType" in the response.

UI and Accessibility changes
This update includes updates to the user interface for the following features of Axon Evidence. For more information about these changes, please see the appropriate feature sections of the release notes.

- Axon Evidence
- ALPR
- My90
- Axon App
- TASER
- Justice
- VR

Other Axon Product updates
See the full release notes PDF for details on the following items.

- Cameras and sensors:
    - Axon Body 4: Device pooling improvements and easier exit of sleep mode
    - Interview
- TASER:
    - Lifetime cartridge deployment field
- Evidence Upload XT
    - Upload XT v2 update, decommissioning legacy Upload XT version authentication, and XTMT updates
- Justice:
    - Sharing with folders

- VR:
    - Run Simulator with a trainer

Bug fixes

- Axon App:
    - Fixed issues with the search function clearing dates and reverting to invalid entries.
    - Addressed time zone re-selection after app refresh.
    - Ensured notes are hidden when the E-note Module feature flag is disabled.
    - Improved the size and visibility of video controls for white-backgrounded videos.
    - Fixed dropdown width overflow in the create report page.
    - Addressed UI issues on the Incident Report page for different screen resolutions.
    - Resolved a homepage loading error for UK agencies.
    - Center-aligned various UI elements on the Incident Report page.
    - Fixed an issue preventing officers from starting reviews on assigned reports.
    - Addressed validation check issues on the Incident Report card.
    - Ensured consistent radio button styles throughout the app.
    - Center-aligned error messages.
    - Fixed issues with the "Send Invite" button placement and behavior.
    - Prevented the success banner from showing after canceling MFA during metadata entry.
    - Addressed a blank space issue in the My Tasks section on iOS.
    - Improved report handling when approving/rejecting multiple reports with the same ID.
    - Fixed the inability to select standard report types.
    - Resolved a grey line display issue in the header for RTL languages.
    - Addressed issues where the app wouldn't display any items on the Select items page or allow selecting a different search category.
    - Fixed the scrubber direction in the media player for RTL layouts.
    - Removed unnecessary blue borders around dialogs and dropdown components.
    - Resolved an issue where the app displayed an unauthorized page after submitting a field interview report.
    - Improved incident report submission handling to prevent infinite loading states.
    - Fixed a floating incident page header issue.
    - Addressed a bug where Person 2's data displayed on Person 1's profile page.

    - Ensured the back button is visible when navigating back from the attachment page.
    - Improved loading indicator placement when viewing files.
    - Resolved routing message inconsistencies between mobile and desktop versions.
    - Fixed date and time display issues for Arabic numerals in RTL layouts.
- Case Management
    - Fixed current issue of cluttering Filters column with disabled custom metadata filters on multiple Case interfaces, including Case Evidence page and Select evidence during case sharing
- Draft One
    - Draft quality improvements when multiple evidence items are selected.

Coming Soon
